Brain-Tumor Removal
and Other Medical
Miracles.

If a healthy and dazzling smile is important to you, you owe it to yourself to see a *Prosthodontist*.

Prosthodontists are dental specialists with two to three years of additional training *after* dental school in an accredited university or hospital-based post-graduate program. While other dentists often refer to Prosthodontists, *you do not need a referral to see one.*

Here's why you should see a Prosthodontist:

- Prosthodontics is the **only** dental specialty recognized by the American Dental Association devoted to restoring and replacing teeth.
- Prosthodontists offer **state-of-the-art** esthetic and restorative procedures including implants, porcelain veneers, crowns, bridges, metal-free fillings, dentures and complete oral rehabilitation.
- Prosthodontists are **specialists** in restoring and replacing cracked, broken or missing teeth. They are dedicated to resolving difficult, complex and even life-long dental problems.

Learn how a Prosthodontist can give you the stunning, healthy smile you've always wanted. The following Prosthodontists are representative members of the **New York Section of the American College of Prosthodontists**, all of whom are dedicated to the highest standards of care.

Contact them directly for more information or to schedule your appointment.
